

[Instructions for downloading a video file \(from the Vimeo website\):](#)

How do I download a video file?

To download a video, click the **Download** button that appears below the video player. Once you've done that, a little menu will appear, and in some cases, you'll see links for several different versions of the video, including a mobile, SD, and/or HD file. You'll need to decide which version of the video you'd like to download, and click to make the magic happen.

All I get is a new window with the video playing.

Depending on your browser, clicking the link may result in the video playing in a new tab instead of downloading the file to your computer. Don't panic! If this occurs:

- **For Windows users:** Right-click on the link and choose "Save as" or "Save target as."
- **For Mac users:** Hold down the Control key on your keyboard and click the link, then choose "Save link as" or "Download linked file."
